# ABDUL HADI ADNAN

AI Quality Analyst | GenAI Evaluation Specialist | Prompt Engineering and Model Assessment
Lahore, Pakistan • 0332-3322337 • abdulhadiadnan1080@gmail.com • github.com/abdulhadiadnan1080

## PROFESSIONAL SUMMARY

Analytical and detail-oriented GenAI specialist with hands-on experience evaluating frontier models including Gemini-family systems. Proven track record in model quality control, fine-tuning assessment, creative multi-turn prompt design, and rigorous evaluation of AI responses for grounding accuracy, natural integration of context, and overall helpfulness. Skilled at identifying flawed inferences, hallucinations, forced connections, and over-narration. Experienced writing clear structured rationales and detailed documentation. Strong English proficiency with excellent written communication. Comfortable working independently in remote settings with high attention to data hygiene and evaluation consistency. Background includes AI compliance frameworks and regulated domain evaluation work.

## PROFESSIONAL EXPERIENCE

**Software Engineer / Technical Owner | Devsinc | 2025 - 2026**

- Led GenAI system design and systematic evaluation of frontier models (Anthropic, Meta, OpenAI, Grok, Ollama, and related systems) for client-critical applications, assessing response quality, grounding, and practical helpfulness.
- Designed and executed multi-turn conversational flows and evaluation scenarios that tested model ability to integrate context accurately without forced or incorrect personalization.
- Wrote clear production runbooks, architecture documentation, and structured evaluation notes used by teams and clients, with explicit reference to specific behaviors and outcomes.
- Built automated compliance and governance pipelines supporting consistent quality standards and safe evaluation environments.
- Owned end-to-end technical delivery for banking and regulated domain projects requiring careful analysis of nuanced requirements and model behavior.

**Selected Evaluation and Delivery Projects**

- Bank GenAI Default-Prevention Pipeline: Designed and evaluated full processing pipeline using Amazon Bedrock. Assessed model outputs against bank and regulatory policies for accuracy and grounding. Handled 88,000 users with tight quality and cost controls.
- Scalable Cognitive Chatbot Platform: Re-architected and evaluated conversational system for natural response quality, context integration, and helpfulness. Scaled from 1 to 100 concurrent users and 110,000 interactions per month with sub-3-second processing while maintaining high response fidelity.
- Predictive Extraction and Onboarding Pipelines: Designed LLM-powered pipelines and evaluated outputs for correct inference, grounding to source data, and natural integration without over-narration or forced connections.
- Developer Sandbox and Governance Systems: Created isolated evaluation environments and automated quality policies enabling safe, consistent testing of model behavior prior to production release.

**Independent Contractor / Freelance Cloud and GenAI Engineer | 2021 - 2025**

- Progressed from hands-on model quality control and fine-tuning assessment on frontier models (including Gemini-family work) to Pod Lead managing a team of 5 engineers focused on model quality, capability improvements, and consistent evaluation standards.
- Designed creative multi-turn prompts and evaluation scenarios based on real-world and personal-context use cases to thoroughly test model personalization, grounding, and response naturalness.
- Performed detailed side-by-side analysis of model outputs, identifying subtle differences in naturalness, over-narration, incorrect personalization, poor inferences, and hallucinations.
- Wrote clear structured rationales and detailed annotations for model quality rankings and improvement recommendations, referencing specific response elements and conversation turns.
- Led AI compliance remediation for clients adapting to EU AI Act, Colorado AI Act, and related frameworks. Redesigned evaluation pipelines and governance to ensure responses met regulatory and ethical quality standards.
- Delivered production GenAI systems and evaluation frameworks for regulated clients in Healthcare, Fintech, Legal, and Banking under NDA, with strong emphasis on data hygiene, accuracy, and independent remote delivery.
- Consistently produced high-quality documentation, evaluation reports, and production runbooks demonstrating superior written English and attention to detail.

## EDUCATION

**Bachelor of Science in Computer Science (BSCS) | Forman Christian College University | Graduated Early 2026**

Coursework: Machine Learning and Deep Learning. Multiple international academic programs abroad.

**Exchange Student - Data Science | Lingnan University, Hong Kong**

## TECHNICAL AND EVALUATION SKILLS

**AI Evaluation and Quality:** Model quality control, fine-tuning assessment, creative multi-turn prompt engineering, side-by-side (SxS) response ranking, grounding analysis, integration quality assessment, identification of hallucinations and flawed inferences, naturalness and over-narration review, structured rationales and detailed annotations

**LLMs and Frontier Models:** Gemini-family systems, Anthropic, OpenAI, Meta, Grok, Ollama. Experience evaluating personalization, context utilization, and response helpfulness

**Analytical and Communication:** Exceptional analytical thinking for nuanced AI responses, meticulous attention to detail, clear concise written English, constructive feedback, independent remote work, data hygiene practices

**Supporting Technical:** Amazon Bedrock, Lambda, SageMaker, MLOps, Knowledge Graphs, AWS and multi-cloud environments, compliance frameworks (EU AI Act, Colorado AI Act, California AI Act, HIPAA)

## CLIENT AND PROFESSIONAL SKILLS

Creative prompt design from personal and real-world context • Rigorous evaluation of personalization quality • Clear structured rationales referencing specific turns • Excellent written and spoken English • Independent remote work with high self-motivation • Cross-timezone collaboration • Detailed annotation and constructive feedback • Strong attention to data hygiene and evaluation consistency
