ABDUL HADI ADNAN

Cloud & GenAI Engineer | AWS Specialist | AI Infrastructure

Lahore, Pakistan • 0332-3322337 • abdulhadiadnan1080@gmail.com • github.com/abdulhadiadnan1080

PROFESSIONAL SUMMARY

Cloud & GenAI Engineer specializing in AWS architecture, production GenAI systems, and regulated-industry infrastructure. Designed end-to-end banking pipelines using Bedrock Agents, Lambda, and Iceberg tables that processed 88,000 users at $1–10/day. Led a full regional backend migration that cut monthly costs from $45k to $22k with zero downtime. Converted single-instance cognitive systems into scalable, compliant AWS platforms supporting 100 concurrent users and 110k monthly interactions. Strong experience with full Infrastructure as Code (CDK + Terraform), multi-jurisdiction AI compliance, and writing production runbooks.

PROFESSIONAL EXPERIENCE

Associate Software Engineer (ASE) - Devsinc | 2025 – 2026

- Designed AWS infrastructures with Layer-7 security controls, VPC, Transit Gateway, security groups, NACLs, and hybrid connectivity for banking and regulated workloads.
- Owned GenAI workstreams including model evaluation of Anthropic, Meta, OpenAI, Grok, and Ollama.
- Built daily AWS Custodian pipelines and developer sandbox environments; managed safe teardown with AWS Nuke while preserving audit trails.
- Delivered computer vision and production AI systems across Healthcare, Fintech, and Legal domains with full MLOps. Applied multi-jurisdiction compliance (EU AI Act, Colorado AI Act, California AI Act, HIPAA, PIPEDA, ISO) and multi-cloud (AWS + Azure) designs.
- Wrote complete runbooks and technical documentation for every project delivered.

Selected Projects

- **Bank GenAI Default-Prevention Pipeline:** Built full infrastructure extracting flagged users from Iceberg tables and processing them against bank + government policies using Amazon Bedrock, Bedrock Agent Core, and multiple Lambda functions. Processed **88,000 users** at a daily running cost of only **$1–10**.
- **Bank Backend Regional Migration:** Led 5-month SOW including full system development and zero-downtime migration to a new region. Migration itself completed in **2 days** with on-the-spot issue resolution. Reduced monthly running cost from **$45,000 to $22,000**.
- **Scalable Cognitive Chatbot Tracking System:** Re-architected a single-EC2 system (1 user at a time) into a fully scalable, secure, and compliant AWS platform using Bedrock. Achieved **< 3 second** processing time, supporting **100 concurrent users** and **110,000 interactions per month**.
- **Predictive User Extraction & New Account Onboarding Pipelines:** Built LLM + AWS pipelines that identified users likely to default within 30 days and created a complete onboarding pipeline for new bank accounts that integrated cleanly into the existing environment.
- **Developer Sandbox & Custodian Systems:** Designed isolated sandbox environments and automated Custodian policies so teams could safely test before production.
- **MSP Post-Sale Issue Management Platform:** Built a secure system (GuardDuty + related controls) that routed client issues to the correct internal managers via a clean GUI.

Independent Contractor / Freelance Cloud & GenAI Engineer | 2021 – 2025

- Performed quality control, progressive fine-tuning, and iterative refinement on frontier multimodal models (including Gemini-family work via outsourced engagement). Advanced to Pod Lead, managing a team of 5 engineers focused on model quality and capability improvements.
- Led AI compliance remediation projects for clients adapting to the EU AI Act, Colorado AI Act, and related regulations - redesigned existing ML pipelines and governance to meet new legal requirements.
- Designed and deployed production GenAI systems, computer vision solutions, and cloud architectures for regulated clients (Healthcare, Fintech, Legal, Banking) under NDA.
- Implemented full Infrastructure as Code using both AWS CDK and Terraform across all major projects.
- Consistently delivered complete runbooks and technical documentation.

EDUCATION

Bachelor of Science in Computer Science (BSCS) - Forman Christian College University | Graduated Early 2026

Coursework: Machine Learning & Deep Learning • Multiple international academic programs abroad

Exchange Student - Data Science - Lingnan University, Hong Kong (Design & Algorithm, VR/AR, Unreal Engine 5)

Intermediate of Computer Science (ICS) - Roots International / MIUC, Lahore | 2020 – 2022

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (Bedrock, Bedrock Agent Core, Lambda, Step Functions, EventBridge, CodeBuild, SageMaker, Glue, CloudWatch, SQS/SNS, GuardDuty, Iceberg, VPC, VPC Peering, Transit Gateway, NAT, Firewalls, IAM, Custodian, Nuke), Azure, Multi-cloud, Full IaC (AWS CDK + Terraform)

AI / ML / GenAI: Model Training, Fine-tuning & Evaluation, LLMs (Anthropic, OpenAI, Meta, Grok, Ollama, Gemini-family), Knowledge Graphs, Amazon Neptune, Computer Vision, NLP, MLOps, Bias Mitigation, Production Deployment

Compliance & Security: EU AI Act, Colorado AI Act, California AI Act, HIPAA, PIPEDA, ISO Standards, Enterprise Security Controls

Languages & Domains: Python, React, Flask | Healthcare AI, Fintech, Legal AI, Banking Infrastructure

SOFT SKILLS & LEADERSHIP

Client communication & presentation • Cross-timezone collaboration • Architectural decision-making with international clients • Team leadership (pod of 5) • Production runbooks & documentation • Quick learner with strong initiative
